

RELIAS CLINICAL SOLUTIONS

Relias OB

Reduce variation with *data-driven* education.

In one comprehensive education and analytics solution, Relias OB (formerly GNOSIS) brings the power of data to healthcare quality and patient safety through personalized learning.

IMPACT ON CLINICIANS

- Reduce seat time
- Increase engagement
- Build high reliability

IMPACT ON LEADERSHIP

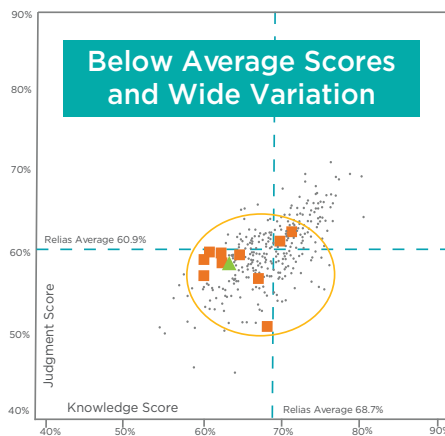

- Streamline education strategies
- Optimize resource allocation
- Reduce team variation

IMPACT ON MOTHERS AND BABIES

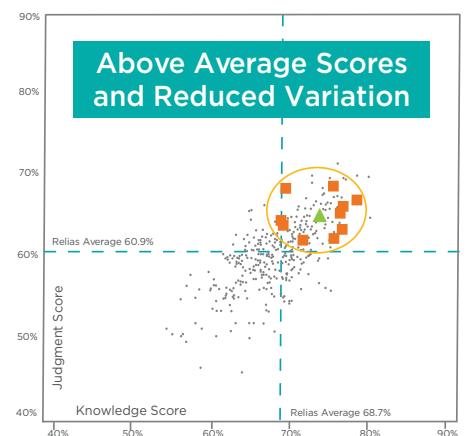

- Increase patient safety
- Reduce risk exposure
- Improve outcomes

Join us as we redefine healthcare education and help health systems build the best patient care teams.

FETAL HEART RATE AND UTERINE CONTRACTION MONITORING

Teaches obstetrical teams how to maximize the effectiveness of intrapartum tools through improved communication using NICHD language and more standardized FHR pattern recognition and management. **UPDATED 2020.**

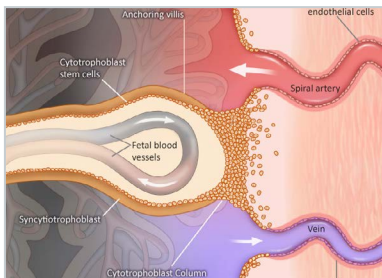

MANAGING SHOULDER DYSTOCIA

Provides the necessary clinical knowledge, procedures, and protocols for the entire obstetrical team to effectively resolve shoulder dystocia, while minimizing risks to the mother and infant. **UPDATED 2020.**

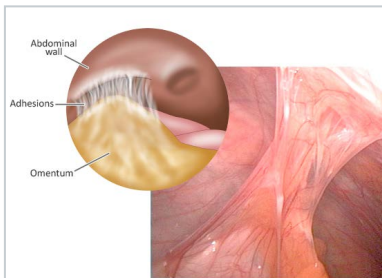

OBSTETRICAL AND POSTPARTUM HEMORRHAGE

Presents the necessary knowledge and framework for effective clinical management of maternal hemorrhage, including implementing processes that allow for potentially life-saving clinical interventions. **UPDATED 2020.**

HYPERTENSION IN PREGNANCY

Provides clinical knowledge and care standards required when managing hypertensive diseases to minimize complications, including early disease recognition and appropriate clinical management. **UPDATED 2020.**

PROMOTING VAGINAL BIRTH

Examines the rise in cesarean birth rate with associated patient, medical, and financial impacts. Clinical strategies to promote safe vaginal birth are presented including promotion of physiologic labor, selective use of labor induction, contemporary labor and FHR tracing management, appropriate use of vaginal birth after cesarean (VBAC), and management of fetal malpresentation.
